Create you own Shop.

Online in 5 Minutes.

Our cloud-based & multi-lingual webshop system is the optimal marketing tool for your business. A simple and clear User-Interface supports your customer while designing their shirt ideas.

Never miss a sales again!

Get ready!

The Shirt Shop Creator you have been waiting for.

Doesn't matter if you are looking for an online solution or something that eases your daily work in the shop. This Shirt Shop Creator gives your customers the tools they need to create their ideas on textile – via PC, Mac, Smartphone or Tablet.

Let your customers design – and have more time for the important tasks: printing and selling!

With built-in designs, interchangeable texts, fonts and colours and of course your own individual ideas, existing customers will love the new possibilities and new customers will approach you exactly because of that.

Many clever minds spent hours together to make your start as easy as possible – welcome to the Shirt Shop Creator!

Adjustable shop front-page.

A welcome as you like it.

We know the importance of a first impression – that's why the first-page of your web appearance is fully adjustable. Add and remove tiles with personalized product-categories, place special deals or popular products in front of customers view or create focus on event based product-lines for i.e. Halloween or Christmas to encourage additional seasonal purchases.

CUSTOMIZE YOUR UNIQUE PRODUCTS

SELECT ITEM

Chose one product and decide its color, size and quantity.

SELECT DESIGN

Chose one design and place it on the selected product.

CREATE

Customize the design by modifying Size, Color and Text.

ORDER

Place your ordner and receive your customized product in a few days

OUR BESTSELLER

User Interface.

Intuitive and clear.

We kept the user interface self-explanatory and straightforward. Customers create their designs with just a few clicks. If your customer doesn't want to create something on their own, they can simply use motifs provided by you and amend them to their likings. For the extraordinary creative minds, the shop also gives them the possibility to upload their own artwork. See the design live on the mockup – in all angles, colours and sizes. Add logos i.e. on the sleeves or on the chest. All of course with an optional live-preview on the price of the final item.

Designs.

Find your style.

We give you a head-start with 300+ free designs to begin with – and many more to come. Of course, you can also upload your own designs and remove designs to your liking. Add further designs and react to different political events, moods and holidays - fast and simple. Still not enough? No worries! We plan to add 5.000+ Premium Graphics against surcharge. And you decide what kind of surcharge is visible to your customer.

Variety.

You determinate the products to choose from.

Choose between a lot of pre-uploaded products like t-shirts, hoodies, mugs, sweaters, hats and more. You can also add and delete products. These so-called mockups (templates) are completely blank or optional with branding of well-known brands like Fruit of the loom and others. This way, you can offer something special to your clients that they can't get anywhere else, creating an USP (Unique selling proposal).

No-Cut Media.

Unlimited possibilities.

Choose between a lot of pre-uploaded products like t-shirts, hoodies, mugs, sweaters, hats and more. You can also add and delete products. These so-called mockups (templates) are completely blank or optional with branding of well-known brands like Fruit of the loom and others. This way, you can offer something special to your clients that they can't get anywhere else, creating an USP (Unique selling proposal).

Point of Sales (POS) Kiosk.

Serve all those clients.

Even designing on a POS-Kiosk (Point of Sale) in a shopping mall or smartphone is possible. Customers can make a shirt while eating ice cream around the corner. The shop creates an individual job number, which can be accessed to every point in time – without the need to input any personal data. Or you set up several POS-Kiosks and serve multiple customers simultaneously. They design their shirts and get a printed receipt for the printing station. After a set time, they can pick it up at your store.

Online or Shop in Shop.

Be creative anytime, anywhere.

Other webshop-solutions limit you to online-business only. The Shirt Shop Creator can also be used to enrich your customers experience at the point of sale. From experience we know, that customers associate much more value with a product if they have an influence on the design. Offer services that large online printers can't: See the garment in real, touch the product, try on a shirt.

The customer can come into your shop and sit down at the terminal, or simply at your tablet. Now he can design the product on his own. Why don't you serve a coffee in the meantime and earn some extra?

SERVICE	SHIRT SHOP CREATOR	OTHER SHOPS
